Thank you for choosing Dank Reviews to have your product reviewed. Our team of reviewers have successfully completed the review of your product.

This report provides you with detailed feedback for each of the questions that are asked in our review process. Our reviewers can also provide personalized feedback of the product. A summary of the notes is also provided in this report.

Please remember that all our reviews are blind and non-biased. All our reviewers work in the cannabis industry and have been selected based on their knowledge of cannabis. They will be more critical than the average consumer. Our goal is to provide you with honest feedback from the industry. Our mission is always to help LPs get the feedback they need to produce excellent products that the industry will confidently recommend to customers.

We have also provided you with a DANK CERTIFIED SCORE of your product. The Dank Certified Score is calculated using our proprietary formula based on the feedback provided by our reviewers. You are welcome to use this score in your marketing and promotional materials.

Please note that the Dank Certified Score is only specific to the batch mentioned in the review report and should only be used to promote the current batch. If your product is significantly different for future batches, we recommend having a new review done to keep your marketing materials accurate and honest.

Thank you for doing business with Dank Reviews. We look forward to reviewing more products for you in the future.

## REVIEWER FEEDBACK

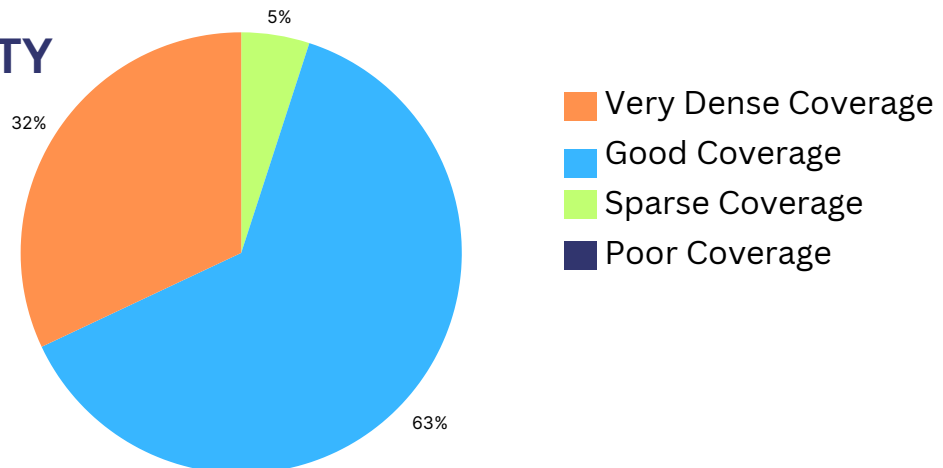

### BUD INTEGRITY

Rate the combination of how well the buds developed and how it was preserved in the packaging. Consistent bud shape and colouring is desirable.

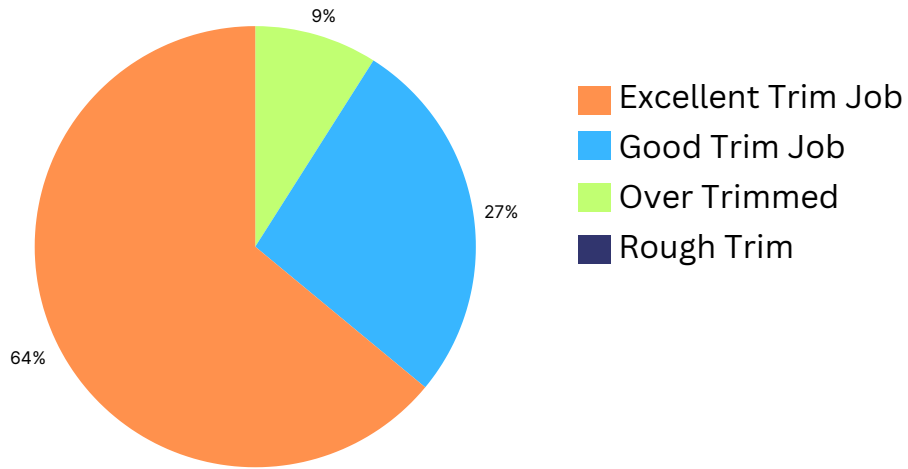

### TRICHOME DENSITY & DEVELOPMENT

Rate the Trichome coverage, density, and health

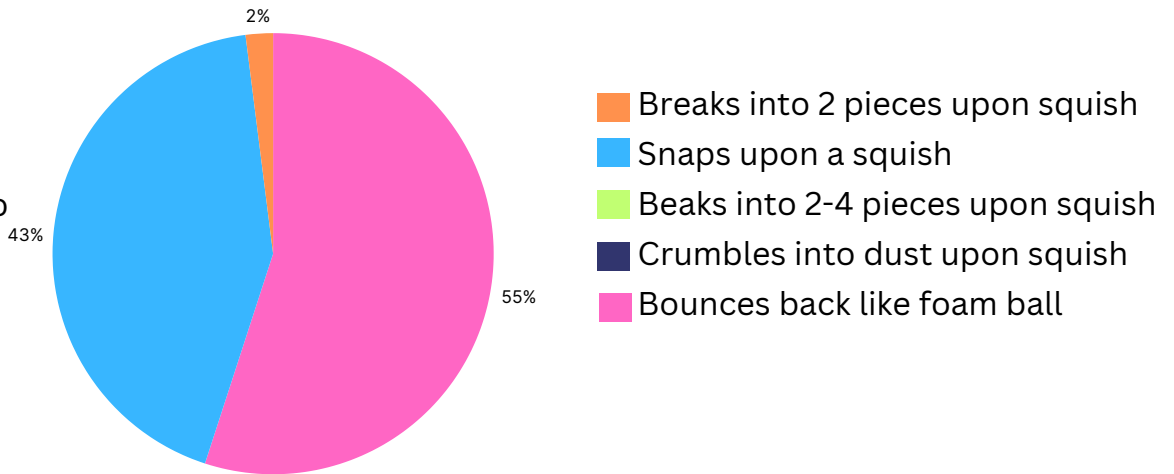

## TRIM QUALITY

Rate how well-trimmed the flower is. Ideally, a bud is intact, clean, and free of sugar leaves

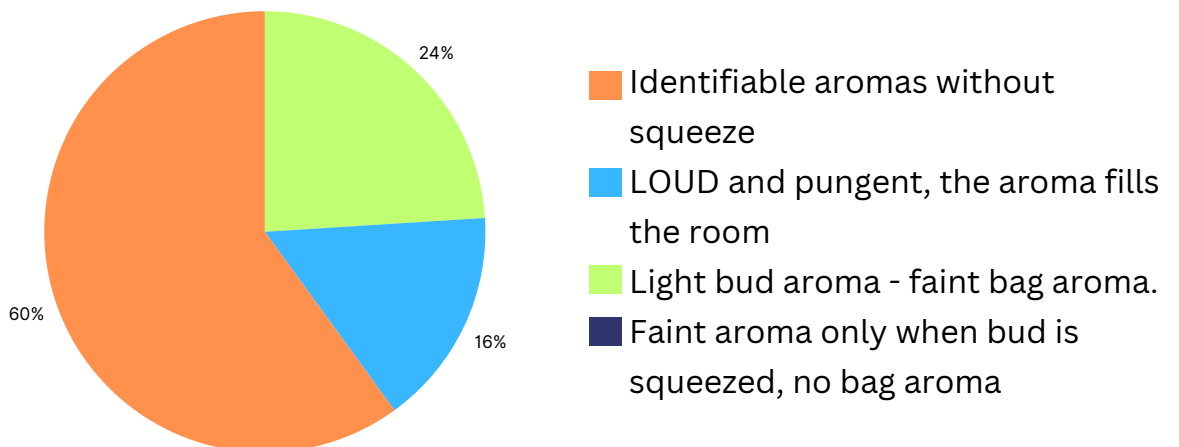

## MOISTURE ANALYSIS

Squish the bud to see if it bounces back. Ideal moisture gives the texture of a marshmallow or foam ball.

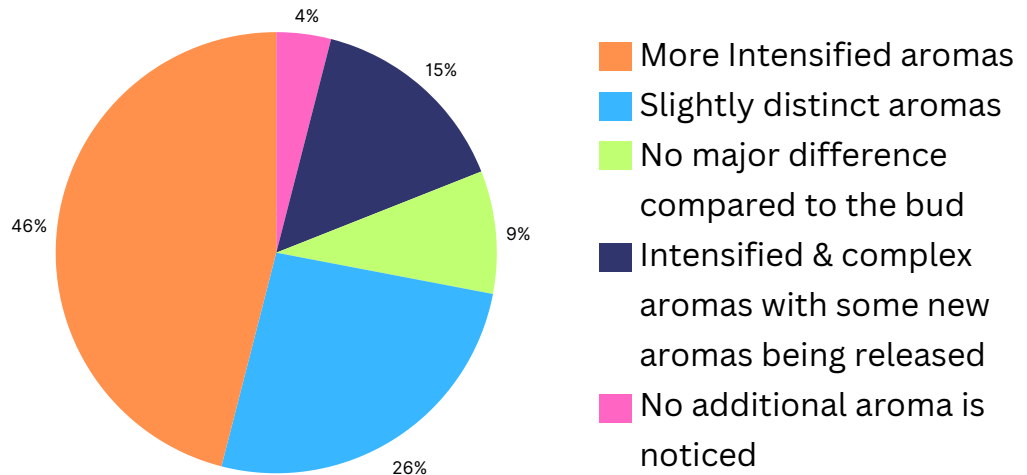

## ODOUR STRENGTH

Rate how strong, pungent, or LOUD the odour is, and NOT how much you like it.

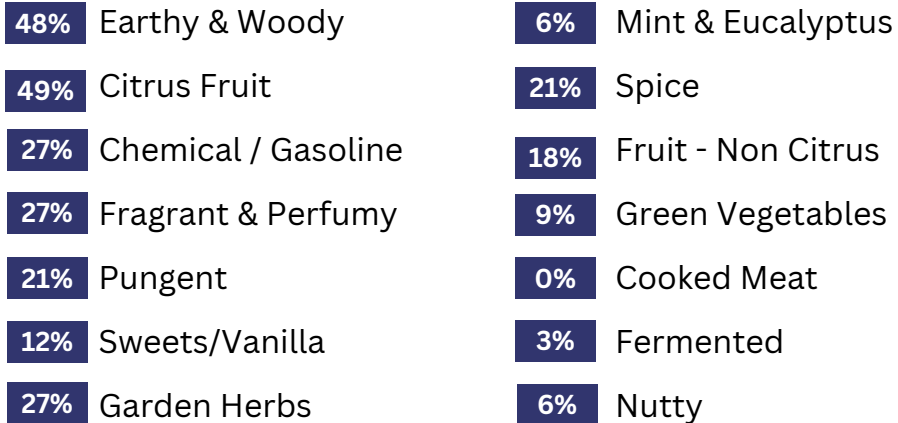

## POST GRIND AROMA

Upon grinding the flower, odors should be released; however, finding more intense, distinct, and complex aromas adds to the overall quality. Rate the post-grind aromas.

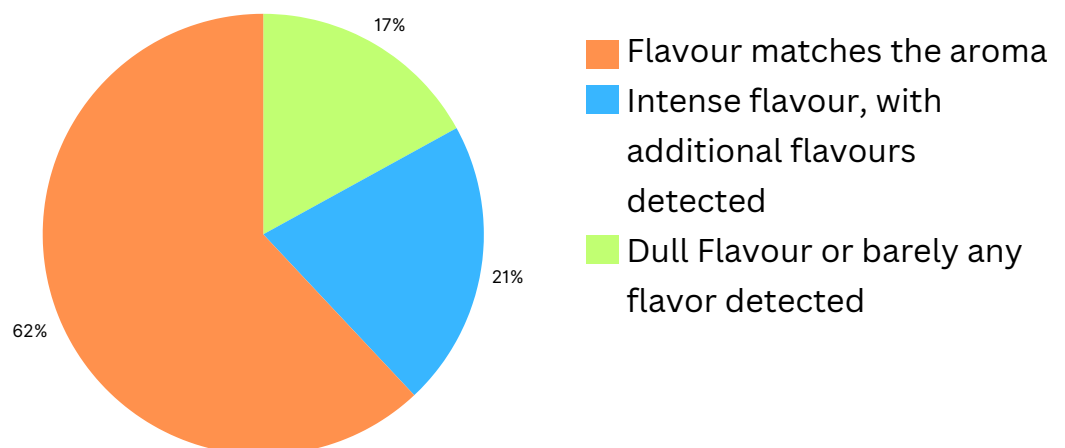

## DETECTABLE AROMAS

List the aromas that you can smell.

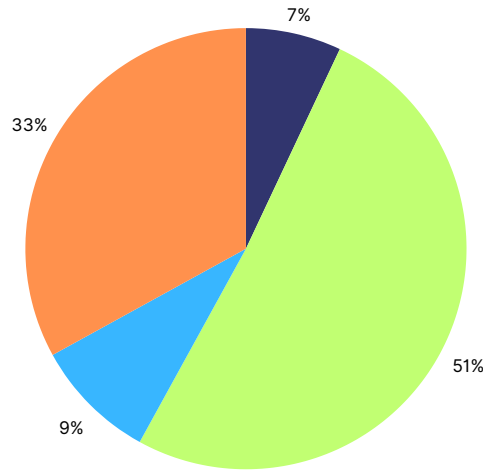

## DRY PULL FLAVOUR

Do this BEFORE you light the joint. Take a dry pull. Rate how similar the joint taste is compared to the smell.

## FLAVOUR COMPLEXITY

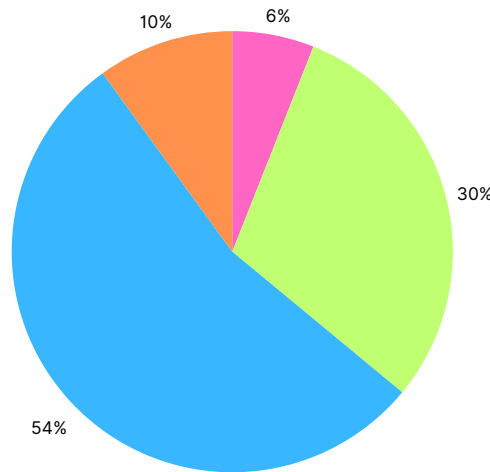

Do this AFTER you light the joint. How many different flavours and layers of flavours can you identify? The more flavours, the more complex it is.

- Flavour is identifiable, but not dominant overall
- Flavour is very identifiable and all the small tasting notes can be identified
- Flavour is identifiable and dominant
- Dull flavour with non-distinctive taste
- Off flavours: salty, bitter, moldy, ashy

## FLAVOUR INTENSITY

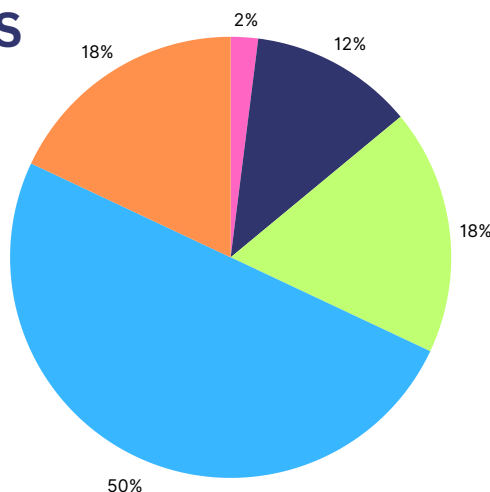

Rate how strong is the flavour - does it intensify as you continue to smoke it?

- High - Clear and intensified flavour profile
- Medium - high intensity
- Medium - low intensity
- Minimal flavour intensity
- No flavour intensity

## SMOOTHNESS

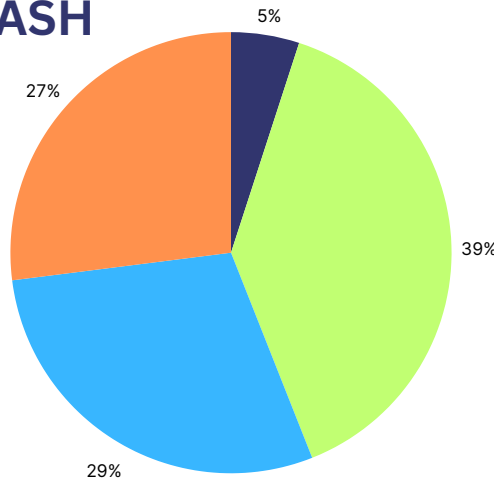

Rate how smooth is the smoke experience in your mouth, throat, lungs, and nose.

- Smooth, creamy and silky to the end of the joint with no harshness
- No harshness and mostly smooth all the way down
- Slight harshness
- Tolerable but slightly irritating - gets harsher down the joint
- Harsh and irritating on the throat

## COMBUSTION & ASH

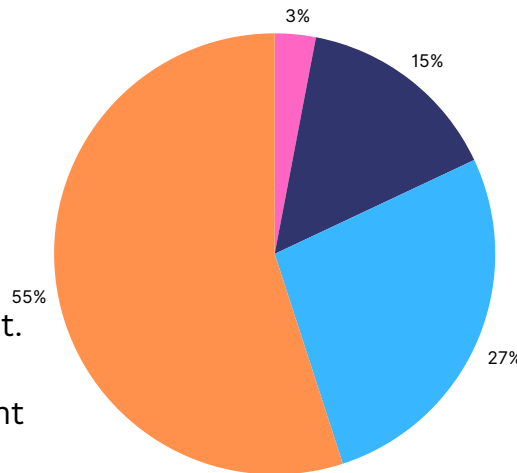

Rate the combination of the ash colour, texture, and if the joint needs re-lighting. A joint that burns to the end without re-lighting as well as a fine, light colored ash is desirable.

- Burns all the way through to the end without re-lighting with a fine textured white ash
- Burns all the way with a fine textured ash that may be a mix of white and black
- Burns well with a salt and pepper ash
- Salt & pepper ash with chunky textured ash

## ENDURANCE OF FLAVOUR

Judge how the flavour is retained throughout the burn. It should be similar to the aroma, however it may change as you burn the joint. Indicate the number as a percentage of the burnt joint when the flavour is lost.

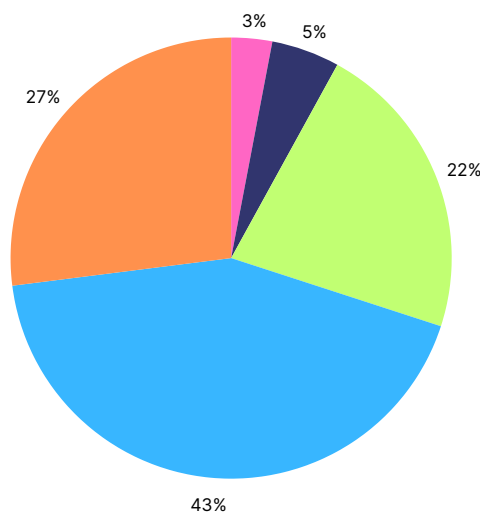

- Flavour is present all throughout the joint
- Flavour is present for 3/4 of the joint
- Flavour is intensified throughout the joint
- Flavour is present for 1/2 of the joint
- Flavour diminishes after 1/4 of the joint
